

Energetic Counseling: Self Discovery and Interventions
Coming to Chicago September 9, 10, and 11!!!
8:30 am-5:30 pm each day
Location TBA

This course is for the beginning and advanced Healing Touch Practitioner who is interested in refining their therapeutic communication skills and in recognizing the energetic patterns of interactions. In particular, issues and emotional discharge which often occur within the Healing Touch sessions will be addressed. Therapeutic interventions from an energetic perspective will be the main focus of this course, as well as skill building with the best communication approaches. Participants are encouraged to bring examples of situations which they have experienced with their clients. This course is a 24-hour program which blends the art of therapeutic communication with the energetic patterning that occurs within the Healing Touch interactions.

Instructor: Sharon Scandrett-Hibdon, RN, PhD, CS, FNP, HTCP/I has taught therapeutic communication at two major universities to graduate and undergraduate nursing students for the past 22 years. She brings this rich teaching background and blends it with her energetic and psychotherapy experience to provide a rich learning experience which has very useful tools for the practitioner.

Energetic Counseling is another tool which blends well with the core curriculum of the Healing Touch program.
